PROFILE

I'm a Software Engineering Student, currently I make some web pages to learn more about Frontend. Besides that, I rather like to develop with C++ and Python, for that reason in 2022 I'm focusing on them to learn about VR and AR. TeamWork and Communication are my strength, on the other hand, I fail a lot while learning and I'm a shy person at the beginning of a relationship.

EDUCATION

Software Engineering
State University of Ponta Grossa
